Pinhole Leaks in Copper Pipes in Potable Water Distribution System: Causes & Prevention

Date: As published on website Venue: As published on website

Course Overview

Pinhole leaks in copper pipes and tubing in potable water distribution systems in hotels, hospitals, homes and other residential and office buildings have been on the rise in recent years. The insidious leaks not only cause losses of water but may also cause serious damages to the walls, ceilings, fittings, furniture and other valuables. The leaks often raise health concerns of the quality of drinking water.

This corrosion short course is available for in-house training, online and distance learning worldwide. It can also be customized to meet the specific needs of your organization.

Who Should Attend

This 1-day course provides an excellent avenue for facility and building managers, maintenance engineers, homeowners, plumbers, water suppliers, copper pipe fabricators and suppliers to gain an insight into the causes of pinhole leaks and methods of prevention.
